Professional Summary

Information Technology student skilled in Java, Python, Full-Stack Development, and AI technologies. Experienced in building web applications and AI-powered solutions through projects and internships, with strong problem-solving and software development skills.

Education

Chaitanya Bharathi Institute of Technology

Bachelor of Engineering in Information Technology

Aug 2024 – Present

CGPA: 9.4

VMR Polytechnic College

Diploma in Computer Science and Engineering

Jun 2021 – May 2024

CGPA: 9.9

Experience

Viswam AI

May 2025 – Jun 2025

AI Developer Intern

Hyderabad, India

- Worked on AI applications using Large Language Models (LLMs), prompt engineering, and chatbot development.
- Developed AI-assisted solutions using Python, APIs, and web technologies to enhance user interaction and functionality.
- Built and tested intelligent applications while applying debugging, testing, and performance optimization techniques.
- Collaborated on projects focused on Generative AI, automation, and practical industry-oriented AI solutions.

Projects

Leave Management System | *Node.js, Express.js, MongoDB, AWS*

[GitHub](#)

- Developed a full-stack leave management system to handle employee leave requests and approval workflows.
- Designed and implemented REST APIs with MongoDB for efficient backend integration and data management.
- Deployed the application on AWS Cloud to ensure scalability, availability, and real-world usability.

Mini E-Commerce Platform | *MERN Stack*

[GitHub](#)

- Built a full-stack e-commerce platform featuring product listings, shopping cart functionality, and order management.
- Implemented secure user authentication and backend APIs for handling transactions and data flow.
- Designed a responsive user interface and optimized application performance for an improved user experience.

Weather App | *Python, Flask, OpenWeather API*

[GitHub](#)

- Developed a weather forecasting web application using Flask and OpenWeather API.
- Implemented search functionality, temperature conversion, and dynamic UI updates.
- Applied testing and debugging techniques to ensure reliable performance.

Technical Skills

Languages: Java, Python, C, SQL

Web Technologies: HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, VS Code

Core Concepts: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Software Development: SDLC, Agile Methodology, Full-Stack Development, Deployment, Authentication

AI Technologies: Prompt Engineering, Generative AI, Large Language Models (LLMs)

Leadership

Credit Card Fraud Detection System

2025

Team Head

Academic Project

- Led a team in developing a machine learning-based fraud detection system using Random Forest.
- Coordinated task allocation, data preprocessing, feature engineering, and model evaluation.
- Collaborated with team members to improve fraud classification accuracy and ensure timely completion.

Certifications

MongoDB Certified Associate Developer
